RAJ PATIL

+49 1637139585 ⋄ Berlin, Germany

patilraj.sunita@gmail.com ⋄ linkedin.com/mrrajpatil ⋄ www.patilrajsunita.me

OBJECTIVE

Early-career Machine Learning Engineer with 2 years of experience in data processing, model development, and evaluation using Python. Currently expanding into API development, CI/CD workflows, and deployment practices to build production-ready ML systems. Interested in scalable AI infrastructure and platform engineering.

EDUCATION

Master In Artificial Intelligence and Big Data, SRH University Berlin — Expected 2027

Relevant Coursework: Software Development, Machine Learning, Artificial Intelligence, Advanced Mathematics

SKILLS

Programming	Python (Pandas, NumPy, scikit-learn)
Machine Learning	XGBoost, LightGBM, Feature Engineering, Model Evaluation
Languages	Python (Advanced), SQL(Intermediate)
Tools	Git, Jupyter, Google Colab (Advanced)
MLOps/Engineering	Docker, Git, CI/CD basics, Model Versioning, Logging and Monitoring
Databases	PostgreSQL
LLM Exposure	Prompt engineering, LLM API integration, structured output generation

EXPERIENCE

Programmer Analyst — July 2022 - Nov 2024

Cognizant — *Bengaluru*

- Domain - Cognizant Digital Business (CDB) Artificial Intelligence (AI) and Analytics.
- Led for Managing and Querying data for Retail sector projects.
- Trained in various technologies such as RDBMS, SQL, DBT, Python, ETL, MSBI tools, and Power BI.

PROJECTS

Mini ML Service with Production Setup

Built a containerized ML prediction service using FastAPI with automated CI/CD pipeline (GitHub Actions), unit testing (pytest), and structured logging. Deployed via Docker with reproducible development workflow.

Production-Ready Fraud Detection API (Fintech-Inspired)

Designed a fraud detection system simulating merchant payment transactions with imbalanced classification setup. Trained and evaluated model using ROC-AUC and threshold optimization to balance false positives and recall. Exposed model via FastAPI endpoint for real-time scoring. Dockerized application and structured repository following production best practices. Documented monitoring, retraining strategy, and model rollback considerations.

PROFESSIONAL CERTIFICATION

- IBM Data Science Specialization (Coursera) verify
- IBM Machine Learning Specialization (Coursera) verify

LEADERSHIP

- Admin for the Tharun Speaks "Time Machine" Discord with 250+ enrolled students. Actively involved in moderating discussions, facilitating course-related events, and supporting students alongside a team of moderators.
- Organised weekly coding sessions in university AI club, mentoring peers on Python and ML best practices.
